CUYUNI GOLDFIELDS LIMITED

This interesting stock with head office in Whitehorse, Yukon recently appeared on eBay. A little sleuthing on the internet turned up the following information.

The following is from Guyana Goldfields Inc. website.

"We have collected some articles published between 1940 and 1948 regarding the original mining operation on the Aurora Property in Guyana, South America. The articles illustrate the exploration conducted during that period.

"December 12, 1940 - Northern Miner Development work to date consists of opening up the Aleck Hill and Mad Kiss orebodies by tunneling, drifting and crosscutting 100 ft. below surface. This work is reported to have indicated 128,000 tons of ore grading 1.4 oz. Per ton.

"February 15, 1945 - Northern Miner The Vancouver office of Cuyuni Goldfields Ltd., has been advised by W.J. Asselstine, consulting engineer, who is now at the property in British Guiana, as of February 6th that the south drift on the lower level (140 ft.) has been advanced a further 28 ft. from the crosscut and average assays give 2.2 oz. gold per ton across a full face of six feet. The crosscut has now been advanced both ways in the ore at right angles to the drift and now extends 33 ft. in width, with both faces continuing in ore. Average assay over the full width is 1.43 oz. gold per ton.

"May 17, 1945 - Northern Miner The north drift on the No. 2 level continues in ore with an average width of 10 ft. and average content of 0.70 oz. gold per ton.

"May 24, 1945 - Northern Miner Cuyuni Goldfields Ltd., Vancouver company operating the Aleck Hill mine at Aurora Landing British Guiana, reports the north drift on the No. 2 level continuing with a full face of ore and an average gold content to date of 0.96 oz. gold per ton. The drift is driven a long the footwall and crosscuts are driven at intervals to determine the full width of the vein. The south drift on the same level has a face averaging 5.6 ft. in width and 0.77 oz. gold per ton.

"W.J. Asselstine, MLA., managing director, states that ore in the first 33 ft. of the south-10-raise averaged 1.03 oz. gold per ton."

EDITOR'S COMMENTS

With this, the last issue of AYSB, I would like to thank all that have supported the newsletter, both financially and with information. Unfortunately, there was not enough of the former to continue publication.

The good news is that I will continue to gather information for a possible second edition of my book "*Alaska & Yukon* **Stocks and Bonds**." This is 5 to 10, or even 15 years into the future. It all depends on how much additional information I can accumulate, which actually means how much you send in.

It is my hope that the next edition of the book will be more like the newsletter, with more in-depth information than the first edition. So, in addition to new discoveries of stocks and bonds, I would also like to solicit any articles you may care to have included, or be directed to articles already written so that I can obtain permission to include them. Also of interest are news items (from contemporary sources) and short quotes from books referencing stocks we have listed. It is my intention to incorporate prices realized into the listings, but this may prove cumbersome, and these may be listed separately.

The stock on the front page may not be truly "Yukon" but I found it of enough interest to include it. If nothing else, it shows that Yukoners followed the gold, even to the wilds of South America. The discovery was significant enough to still be in production today.

And so, I say thank you again, and keep those cards and letters coming!

LISTED, NOT ILLUSTRATED

BONANZA CREEK GOLD MINING COMPANY LIMITED

Page 102-1; Holabird, 7/06, 2 pcs. sold for $60

NOT ALASKAN

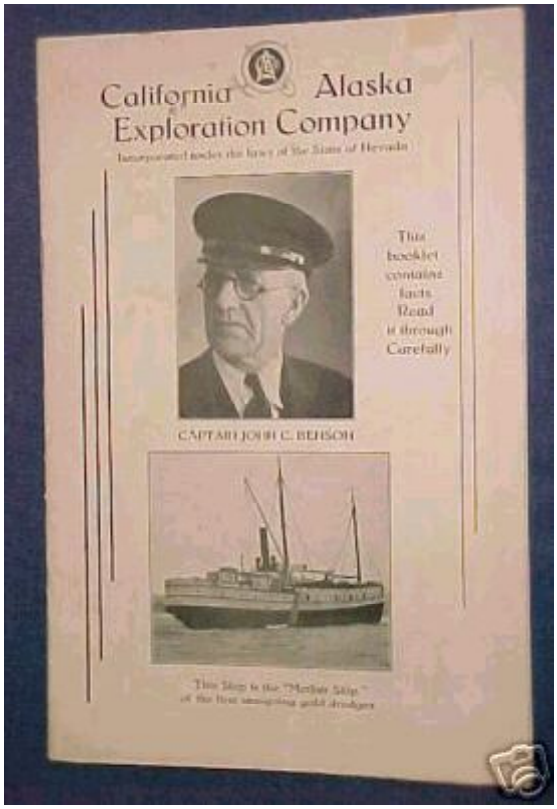
McKinley Mining & Development Company: Incorporated in Arizona in 1906, this company operated in the Copper Basin Mining District south of Prescott, AZ — not in Alaska. -Douglas McDonald

From the **Douglas Island News**:

2/3/02: The price of Alaska Central Railway stock, is quoted in a Seattle paper at $8.00 a chance.

Undated: The Alaska Central R.R. company, in its prospectus outlines its intention of building, in addition to its main line from Resurrection Bay to Rampart, three branches, with the idea of diverting the Copper River traffic from Valdez to its own terminals.

PROSPECTUS!



1934 California-Alaska Exploration Company Brochure & Prospectus... This interesting booklet is a prospectus to potential investors for the exploration of Gold in the Territory of Alaska. It seeks investor capital of $500,000 in exchange for issuance of 5,000,000 shares of storck. The idea was to acquire a ship (under command of Captain John C. Benson), airplane for scouting, and diving apparatus, for sea going gold dredges. The Nevada Corporation was to have based its gold prospecting operation out of the City of Nome, Alaska. Contains approximately 28 pages on glossy paper. Inside are lots of nice B&W photos of people, places and machinery that were to be employed. Generally good condition - clean and fully intact, but edge wear from age. eBay PR $77.66

From the **Douglas Island News**:

12/3/02: The Pioneer Mining Company of Nome has declared a 6 per cent dividend on capitalization of $5,000,000, or $25,000.

3/25/08: The Yukon Basin Gold Dredging Co. is said to control the most gigantic as well as the most promising mining properties ever entertained and undertaken in the north. Former Governor William Ogilvie is at the had of it.

Alaska & Yukon

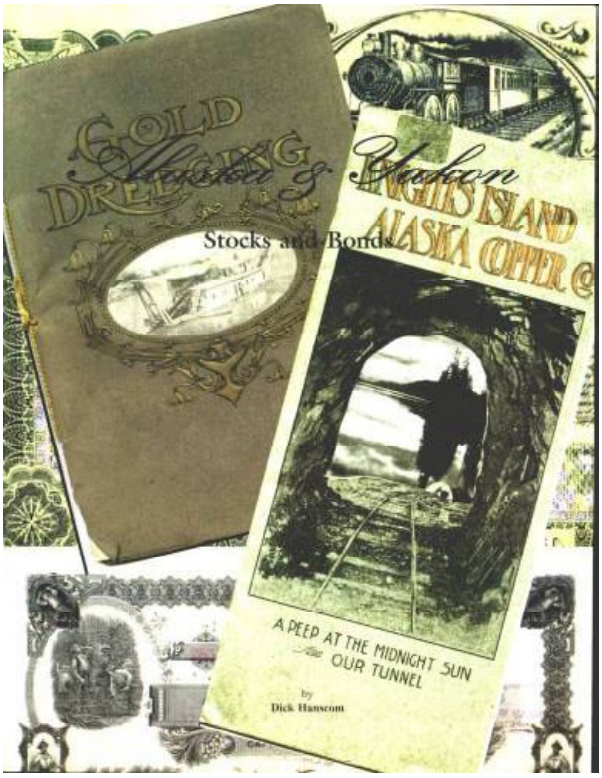
STOCKS AND BONDS

Our book *Alaska & Yukon* **Stocks and Bonds** is in stock and ready for immediate shipment.

The book is 344 pages with over 700 listings and over 500 photos. It is fully indexed, with two different indexes. Appendixes include listings of incorporated companies known to have done business in Alaska, but not represented in the listings. Company prospectuses are featured, and historical information supplements some of the listings.

The price is $35 postpaid via bookrate. The book can be shipped via priority mail for an additional $6. Please send orders to Alaska Rare Coins, P.O. Box 72832, Fairbanks, Alaska 99707.

If your copy is all marked up and getting dog-eared from exhaustive use, tear off the front cover, and return it to us with payment of $20 plus $3 for postage and handling and we will send a new copy!



CUYUNI GOLDFIELDS, CONT.

Cuyuni GoldFields Limited apparently was succeeded by Guyana Goldfields, Inc.

"Guyana Goldfields has 2 properties in Guyana, South America - Peters Mine Property and the Aurora Mine Property. They are the 2 largest past producing mines in Guyana with over 96,810 ounces of gold from 162,428 tons (approximately 0.60 ounces per ton) produced between them. Recent exploration has revealed the location of several high potential zones on both properties.

Aurora Mine

"Several mineralized zones discovered to date and high grade drill intersections including 46.5m @ 5.82 g/t Au at the Rory's Knoll zone and 0.5m @ 2589 g/t Au. at the East Walcott Zone. Exploration efforts including Diamond Drilling, Soil Sampling and Trenching are continuing on this property.

"Recently the Company acquired an additional 148,000 acres of land adjacent to the Aurora Property.

Peters Mine

"Peters Mine has numerous large intersections of high grade gold and potential for over 600,000 ounces of gold in shallow, oxidized resources.

"Guyana Goldfields also owns the **Coppermine Property** consisting of 75,747.69 acres in Kugluktuk, Canada. Currently a Joint Venture exploration program with Coronation Minerals Inc. is under way.

"The property hosts the most advanced Copper, Nickel, PGM Noril'sk type exploration targets in Canada which were recently defined by ground geophysics and geochemical and sampling programs during the 2002 field season."

The following is from Coronation Minerals website:http://www.coronationminerals.com/

Coppermine River Property
"Within the 75,747.69 acre Coppermine River Property there are at least 12 documented copper-silver occurrences as well as encouraging indications for gold and platinum. The northern claim block(75,747.69 acres) hosts a major gravity/ magnetic geophysical anomaly which represents a potential billion dollar Noril'sk type drill target. The Noril'sk region of Russia's high arctic currently produces about 20% of the worlds nickel, more than one third of the worlds palladium, a quarter of its platinum and 20% of its copper.

Wellgreen Mine Property
"The Wellgreen platinum group metal (PGM_ rich, copper-nickel deposit is located in the southwestern Yukon, approximately 317 km northwest of Whitehorse and 125 km north west of the town of Haines Junction. The property consists of 91 claims held under a renewable 21-year mining license.

"Mineralization on the Wellgreen property occurs within a variably serpentinized, 20-km-long ultramafic body, known as the Quill Creek COmplex, that intrudes Permian sedimentary and volcanic rocks. Three main zones of PGM-enriched copper-nickel mineralization have been outlined on the Wellgreen property, the East Zone, the West Zone and the North Zone. Proven and probable reserves are estimated to be 50.03 million tonnes grading 0.35% Cu, 0.36% Ni, 0.54 grams/tonne platinum and 0.34 grams/tonne palladium (WGM 1989)."

Ed. Note: So after 60+ years, a company based in the Yukon, and mining in Guyana, still has interests in Yukon and Nunavut!

* *

Thanks once again to all those who contributed financially and with information.

We will continue to collect data on Alaska and Yukon stocks and bonds, and welcome any information you wish to send in.
